

World Population Distribution

Introduction

A bar chart displaying the population of the top 10 most populous countries.

Bar Chart: Top 10 Most Populous Countries

Data:

COUNTRY	POPULATION
CHINA	1,411,778,724
INDIA	1,393,409,038
USA	332,915,073
INDONESIA	276,361,783
PAKISTAN	240,485,658
BRAZIL	214,326,223
NIGERIA	206,139,589
BANGLADESH	173,973,160
RUSSIA	143,446,060
MEXICO	126,014,024

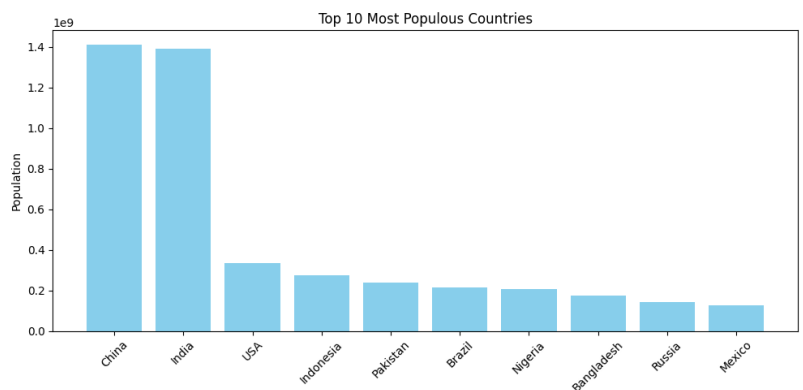

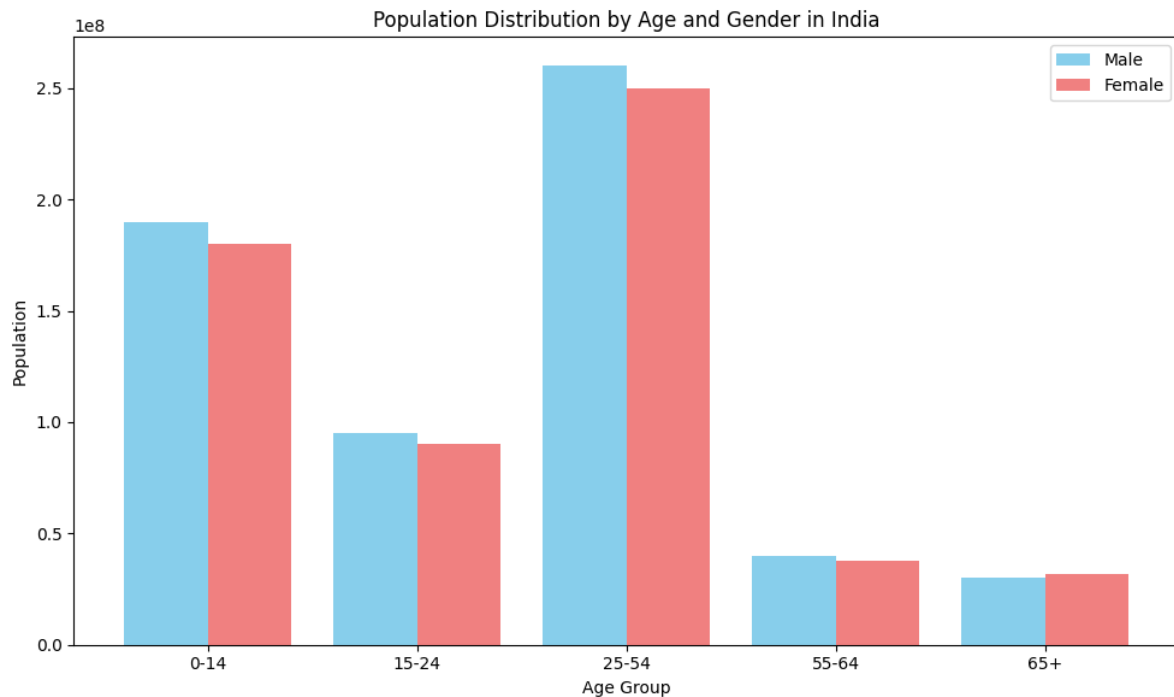

Chart Description:

- This bar chart compares the population of the top 10 countries.
- China and India dominate globally, each with over 1.3 billion people.
- A significant drop is seen from India to the USA and further down to others.

Demo graph of India's population

1. Youthful Population

- Both male and female populations are **heavily concentrated in the 0–14 and 15–24 age groups**, indicating India has a **young demographic profile**.

2. Largest Demographic Segment

- The **25–54 age group** represents the **largest segment** for both genders (≈ 260 M males and 250 M females), underscoring a **strong working-age population**—a key factor for economic productivity and labour market dynamics.

3. Gender Parity Signals Progress

- The **Male-to-Female ratios** are closely aligned across age groups, especially in youth and working-age brackets. This suggests progress toward **gender balance** in birth rates and population demographics.

4. Aging Population Emerging

- Although smaller, the **55–64** and **65+ cohorts** are notably substantial (tens of millions each), reflecting a **growing elderly population**. This indicates India may sooner need to emphasize **elderly care, health services, and social security frameworks**.
